EXPERIENCE

MKG Multimedia Productions, Seattle, WA, Voice Over Artist, January 2017 - Present

- Researched, created the ideation for, designed, developed, and debugged audio projects using tools like Audacity with plug-ins and outside sound asset databases.
- Performed character performances, commercial voice-over, and audio book narration in a local sound studio.
- Development of asset creation process and custom asset pipeline enhanced development time by 30%.

HCL of America, Redmond, WA, QA Analyst, August 2013 - March 2015

- Conducted Hardware/Software testing for the XBox One console, resolving 100+ bugs prior to product launch.
- Develop performance dashboards tracking errors and resolutions to share updates

proactively with the development team.
- Analyzed business requirements and user experience goals to develop test plans and test cases.
- In a Scrum environment, suggested new workflow processes to improve the SDLC process and increased testing turnaround by 15%.

United States Army, Military Police Enlisted, November 2003 - June 2012

- Ran daily stand-up meetings in an agile work environment for shifts of ~20 soldiers in several patrol areas.
- Conducted professional development of individuals and teams including reward, punishment, career coaching, and mentoring.
- Designed a detailed headquarters security plan to coordinate visitors and contractors with security forces, resulting in a 25% reduction in wait time for visiting dignitaries.
- Used interpersonal conflict resolution abilities during law enforcement to diffuse civil disputes resulting in a 10% reduction in crimes relating to retaliation.
- (W4 available upon request)
